

### ***Long vita Markus Reitzig***

Markus Reitzig studied chemistry (Diplom-Chemiker), law and business economics (Master of Business Research, Doctor oeconomia publicae) in Germany (Universities of Constance/Kiel/Munich), Italy (LUISS Rome), and the United States (UC San Diego/UC Berkeley). From 2002 until 2006 he was employed with the Copenhagen Business School in Denmark, first as Assistant Professor and, from 2004 onwards, as Associate Professor with tenure. During winter 2005, he worked with the Australian Graduate School of Management in Sydney as a Visiting Associate Professor. In 2006, Dr. Reitzig joined the London Business School as an Assistant Professor for Strategic Management. In 2012, he finally assumed his current position as Professor at the University of Vienna to head the newly founded Strategic Management Subject Area – a group of approximately ten staff members. In 2014, he served as a Visiting Professor at INSEAD, teaching on its Singapore campus. In 2017 he was a Visiting Professor at Keio University/Tokyo.

For the last two decades, Markus Reitzig's research has been centered on the strategic management of innovation. His prime area of ongoing investigation is the study of novel organizational designs suited to enable distributed innovation, and related behavioral adaptations of classic organizational design theory. In his earlier and currently still most-cited work, Markus studied firms' strategies to appropriate rents from their investments in technology; using intellectual property rights among other mechanisms.

Methodologically speaking Markus combines (formal) theory as well as both qualitative and quantitative empirical/experimental techniques; by maintaining close communication with policy makers and businesses through applied research and advisory, Markus seeks to ensure that his group engages in investigations that both address fundamental scientific questions and matter to practitioners. Prof. Reitzig's research has been supported by several funding agencies over the past years, including the Australian Research Council, the Austrian Science Foundation (FWF), the Austrian National Bank Anniversary Fund, the Deloitte Institute for Innovation, and the Danish Social Science Council.

Articles by Dr. Reitzig have been published/are forthcoming in the top practitioner outlets such as *Harvard Business Review*, *Sloan Management Review*, and *McKinsey Quarterly* as well as in the premier scientific journals such as *Academy of Management Review*, *Organization Science*, *Strategic Management Journal*, *Research Policy*, *Industrial and Corporate Change*, *International Journal of Industrial Organization*, *Journal of Organization Design* and *Economics of Innovation and New Technology*. Until today, his research has been quoted far more than fifteen hundred times in those journals and books that are listed in the Web of Knowledge (ISI etc.), and more than four thousand times on Harzing's Publish or Perish (Google Scholar's) index, and it has been presented at numerous conferences and university seminars worldwide. For his work he has been nominated for the McKinsey best paper award by the Strategic Management Society and the Carolyn Dexter award by the Academy of Management in 2002, and he was awarded the Tietgen Prize for outstanding contributions to business research in 2005. In 2014, he was a finalist for the prestigious Consolidator Grant by the European Research Council (ERC). Since 2012, his lifetime research output as measured by top publications (A/A+) has consistently put him among the top 50 of all business professors in the German-speaking world across disciplines (and among the top ten in the field of strategy). In terms of current visibility in top journals, Forschungsmonitoring.org ranks him among the top 1 percent of all management professors in the German-speaking world at present. His former doctoral students have received offers for tenure track positions from various leading institutions in the US and Europe, and have become assistant professors at Duke University, Erasmus University Rotterdam, and Copenhagen Business School.

Markus regularly reviews for all leading journals in his field, and he was appointed to the Editorial Boards of the *Strategic Management Journal* in 2013, of *Organization Science* in 2014, and of the *Journal of Organizational Design* in 2015. He has also repeatedly consulted as an expert interviewee to leading business papers, such as the *Wall Street Journal Europe*, national radio, such as *ORF1*, and national television, such as *Dubai One*; his management thinking has been featured in *The Economist* and *Business Strategy Review*. Markus is one of the few academics who has been invited to speak at more than just one *TEDx* event over the past years – his keynotes on "Organizations Aiming High" (*TEDx* Kufstein/Tyrolia, June 2016) and on "The Future of Work" (*TEDx* Vienna, September 2020) are available online.

Professor Reitzig has taught in several (executive) programs worldwide. As an academic facilitator, consultant or speaker he has worked together with a variety of clients from the private and public sector, including US Fortune 50 corporations, the United Nations Economic Commission for Europe, the European Patent Office, and the European Investment Bank, to mention but a few. He held several non-executive advisory board positions with start-ups from the new economy/big-data-based business sector.
